OLIVER WILSON

WEB DEVELOPER

ABOUT ME

I consider myself to possess great people skills which afford me an ideal decorum when engaging in conversation. I am a very polite individual who is well-mannered and responsible - a good representative for a company.

I believe that a can-do attitude is the first step towards being an effective member of a team. I thrive off of working on projects where satisfying the end user is the ultimate goal.

Contributing towards a project while employing various frameworks and design patterns while expanding my knowledge in the web domain motivates me to deliver higher quality code.

ACADEMIC BACKGROUND

The University of Kent

Bachelor of Science in Computer Science
Classification: first
- Attended from 2014 to 2017
- Graduated with Honours
- Worked for an IT consultancy during my final academic year

ASOS

Web Developer

September 2017 - January 2020

A core maintainer of the Product Listing Page (PLP) which is an isomorphic app that responds to multiple viewports and is supported by a wide range of browsers. SEO is very important for the page as asos needs to stay ahead of its competitors and therefore rank higher in search results.

Key team member in the re-platforming of the Saved Items application, employing a tech stack of react, redux and node, while using webpack to build the application as well as utilising babel and postcss to use the latest syntax available to developers.

ITV

Web Developer

January 2020 - Present

A major contributor towards the ITV internal react component library which is used across a number of the pages on the ITV.com domain.

Part of the front-end team that delivered the ITV Hub homepage, using react and next js.

COMPETENCIES

- Good knowledge of React, ES6, node, webpack, babel, postcss, docker and other modern web technologies
- I continue to immerse myself in emerging trends in the industry
- I thrive off of a community atmosphere in the workplace

ACCOMPLISHMENTS:

I created my own personal website in my spare time at university. Since graduating and working in industry I have become exposed to frameworks such as React and many software design patterns.

I decided it would be interesting to re-implement the project using tools and concepts that i have learned since graduating. Please visit **https://www.oliverwilson.dev** to find out more.
